

Protect your daughter and son against cancer

Get the 3 HPV* vaccine shots.

*HPV – Human Papilloma Virus

- Ask your child's doctor about the HPV vaccine.
- Vaccinate your daughter and son at age 11 or 12.
- Complete all three shots for full protection.

Shots	Date received
1. Age 11 or 12	
2. 1-2 months after first vaccine	
3. At least 6 months after first vaccine	

Almost everyone will get HPV at some point in their lives. HPV causes almost all cervical cancers. It also can lead to cancers of the mouth, throat and other gender-specific cancers.

Most insurance plans cover HPV vaccine costs. Ask your child's doctor about programs that offer the vaccine free of charge.
